TECH TALK

NAPA 7750S

Due to a change in manufacturing location, the NAPA 7750S now has a new look. The former white can construction has been replaced with an unpainted galvanized can. The filter continues to offer excellent performance and remains suitable for all previously cataloged applications.

Lubricate both sealing gaskets.

As a reminder, it has always been, and remains our recommendation that the selection of a replacement filter be conducted using only the most current application information available. In today's cataloging, the electronic resources (i.e. Internet, interactive electronic) would be the most current application information available. For questions or more information, please contact your local NAPA District Sales Manager or call Product Information at: US 1.800.949.6698, Mexico +52(844)8661-21-50, Canada 1-800-567-3703.
