W10AX LONGER LIFE PREMIUM BREATHERS

The W10AX Premium Desiccant Breather Series offers several advantages over other constructions. Longer life, Check Valve Technology, an Isolation Valve, and a 2 Micron solid particulate filter make this series suitable for a wide range of uses including fume emitting applications. Reusable top and bottom caps readily accommodate replacement cartridges making the W10AX Breather Series a cost effective, efficient option for both solid contaminant and moisture control.

The Breather's color coded guide along with the clear acrylic tube makes it easy to monitor the condition of the color-changing silica gel. This feature, along with the easy screw in/out replacement cartridges, make servicing the product a snap!

Ideal For:	
>	Storage Tanks
>	Fluid Reservoirs
>	Transformers
>	Pumps
>	Gearboxes
>	Recommended for Gas, Bio-Diesel, and Diesel Tanks below 20k Gallons.
